PROFESSIONAL SUMMARY

Cybersecurity student at the University of Cincinnati (GPA: 3.68) with hands-on experience securing self-managed infrastructure using WireGuard, Tailscale, TrueNAS, and Debian Linux across virtualized and networked environments. Proficient in Python, Bash, SQL, and Unix/CLI, with coursework in network security, software security, and system administration. Built production-grade security software at the systems level: kernel input subsystems, privilege separation, and hardened service architecture on Linux.

EDUCATION

University of Cincinnati Cincinnati, OH

Bachelor of Cybersecurity. GPA: 3.68. Anticipated May 2028

Relevant Coursework: Cybersecurity Analysis, Information Security Management, Software Security, Computer Networks, System Administration, Unix Systems, Database Management, Database Programming, Object-Oriented Programming, Operating Systems

Northern Kentucky University Highland Heights, KY

Bachelor of Cybersecurity (Transferred).

PROJECTS

midscroll

- Built a privileged Linux input daemon in Python intercepting raw kernel events via evdev and injecting synthetic events through uinput, functioning across both X11 and Wayland.
- Designed a privilege-separated architecture with a root daemon isolated from an unprivileged session helper, using SO_PEERCRED and logind seat verification to block untrusted local processes.
- Hardened with a systemd sandbox: seccomp syscall filtering, MemoryDenyWriteExecute, and namespace restrictions; a pkexec-invoked writer validates input and regenerates config from a template.
- Packaged for RPM, Debian, and Arch Linux; published under a public-domain license for open security review.

Homelab and Home Infrastructure

- Design and maintain a multi-node homelab secured with WireGuard and Tailscale VPN tunnels, enforcing VPN-only remote access across virtual machines, smart home integrations, and a media server.
- Administer TrueNAS storage, Raspberry Pi OS, and Debian Linux via CLI, applying firewall rules, network segmentation, and access controls across a self-managed environment.

EXPERIENCE

Sales Associate October 2025 – Present

Micro Sharonville, OH

- Diagnose technology needs in a high-volume retail environment, recommending hardware, software, and peripherals.
- Build recurring client relationships through consistent follow-up and technical guidance.

Crew Member April 2023 – September 2025

Raising Cincinnati, OH

- Earned recognition for consistently exceeding service standards in a high-volume, fast-paced environment.

Sales Associate November 2020 – October 2022

Bed Bath and Beyond Mason, OH

- Responded to customer inquiries and cross-trained across departments to support team leads and improve operational efficiency.

SKILLS

Security and Systems: Network Security, System Administration, WireGuard, Tailscale, TrueNAS, Linux (Debian), Raspberry Pi OS, Unix/CLI, Virtual Machines, systemd, seccomp, evdev/uinput

Languages: Python, Bash, SQL, Java, HTML, CSS, JavaScript

Areas of Focus: Cybersecurity Analysis, Information Security, Privilege Separation, Service Hardening, Database Management
